

I currently listen to 6 different translator stations and only 1 commercial station. I believe that the FM translator station service is vital to my local community. These translator stations provide me an alternative that LPFM stations will not be able to provide. LPFM will impact my choice for listening to commercial free music. The translator stations I listen to are part of a network across the country. This network provides me with the same music to listen to while I'm traveling. The service provided by stations like AIR 1 and KLOVE are in the best interest of the public because they are commercial free, play music with a good message and this music has been a huge part in changing my life for the better. Please do not take stations like this off the air.
